For Immediate Release

SACKETT SYSTEMS UNVEILS HIGH-SPEED “NORTHSTAR” BATTERY CHANGING SYSTEM AT PROMAT

Sackett Systems, Inc. (Bensenville, IL) is proud to unveil the advanced NORTHSTAR unmanned battery changing system at PROMAT in Chicago, IL. The fully automated, high-speed NORTHSTAR system is capable of performing battery changes in one minute or less. This is achieved by separating the Super-XChanger battery change-out system from the HK3000/RF ASRS battery storage and retrieval system. It uses laser distance measuring to precisely move, position and map each battery location and is coordinated with the integrated Guardian Battery Management System for optimized battery rotation.

NORTHSTAR is a modular system that can be easily configured to your building’s requirements, and in less than 60-foot of ceiling height will safely store up to 10 batteries high, in either single or double aisle racks. Sackett has incorporated the Allen Bradley SLC control system for ease of use, reliability and longevity.

For more information, contact Sackett Systems, Inc. Phone: 800-323-8332 Fax 630-766-5631 or via e-mail: sales@sackett-systems.com
